

Goleta Community Plan Update

Initiation of Environmental Review for the Draft Goleta Valley Community Plan for Eastern Goleta Valley.

February 21, 2012 – Board of Supervisors Modifications to Land Use and Zoning Maps

1. The 17-acre MTD site be studied with a zoning of 20 units per acre on 10.2 acres and that the agricultural zoning be retained on the remaining 6.8 acres. This would result in the same number of high density housing units and the potential for one unit on the agricultural portion of the site. (APN 059-140-004, -005, and -006)
2. The 23-acre Tatum site be studied with a zoning of 20 units per acre on 13.8 acres and one unit for the remaining 9.2 acres. This would result in the same number of high density housing units and the potential for one additional unit on the remainder of the site. (APN 065-040-026)
