

Public Comments and Photos of MTD Property during recent rain events - March 2011

Submitted by Paul Sturken, March 24, 2011

I'm a second district resident and am concerned about the proposal to re-zone the MTD property. Open space and agricultural land (the property was farmed successfully, as you know) are vital to the life of any community.

In addition, much of the MTD property is subject to flooding, as the included photographs, taken during heavy rains a few years ago, illustrate.

If possible, could you please assure that these photos a part of any debate on the MTD property, and available to the members of the GVPAC committee?

Thank you.
