

NOTICE OF PUBLIC WORKSHOP:

COUNTY OF SANTA BARBARA — COASTAL RESILIENCY PROJECT

Thursday, September 14, 2017

6:00—7:30 p.m.

Goleta Valley Community Center

5679 Hollister Avenue, Goleta

The County of Santa Barbara has completed a **Sea Level Rise and Coastal Hazards Vulnerability Assessment** for the unincorporated areas of the County.

The County has modeled and mapped coastal hazards from sea level rise through the grant-funded Coastal Resiliency Project. These coastal hazards, and their potential impacts to important assets along the coastline, are presented in the Vulnerability Assessment.

Please join us to discuss the results of the Vulnerability Assessment, as well as possible adaptation measures and strategies to minimize future impacts from sea level rise.

If you would like more information or are unable to attend the workshop, you can still provide input by visiting the Coastal Resiliency Project website at www.longrange.sbcountyplanning.org, or by contacting Selena Evilsizor, Planner at sevilsizor@countyofsb.org or (805) 568-3577.

Funding for the Coastal Resiliency Project was provided through grants from the California Coastal Conservancy, Ocean Protection Council, California Coastal Commission, and matching funds provided by the County.
